SUNBEAM VARUNA SCHOOL & HOSTEL, VARANASI

Sunfest.live

Platform Usage Report — Sunfest 2026

Prepared for: The Principal, Sunbeam Varuna School & Hostel
Event Dates: 31st July & 1st August 2026

"Technology is at its best when it makes people's lives simpler."

Summary

Sunfest.live was built as the official live digital companion for Sunfest 2026, giving students, teachers, coordinators, parents and supporters one single place to follow every event as it happened. The platform replaced the need to run between venues for updates, bringing live scores, rankings, editorials and event status straight to everyone's phone.

Over the two days of the festival, the platform was used far beyond expectations. It comfortably handled thousands of visitors, hundreds of simultaneous live viewers, and lakhs of page reads — all without a single hiccup in performance. What follows is a simple look at how the platform performed and how the school community engaged with it.

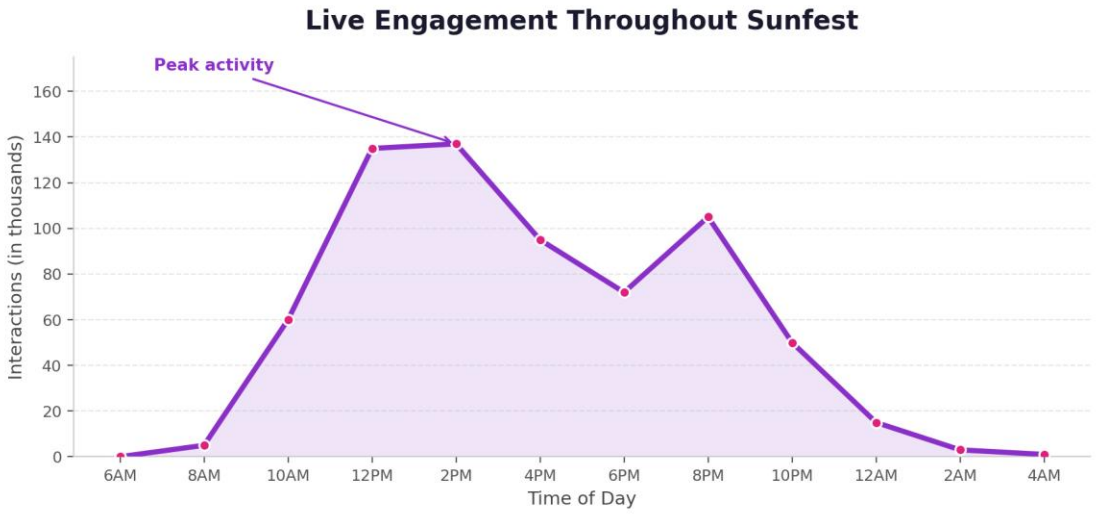

Impact at a Glance

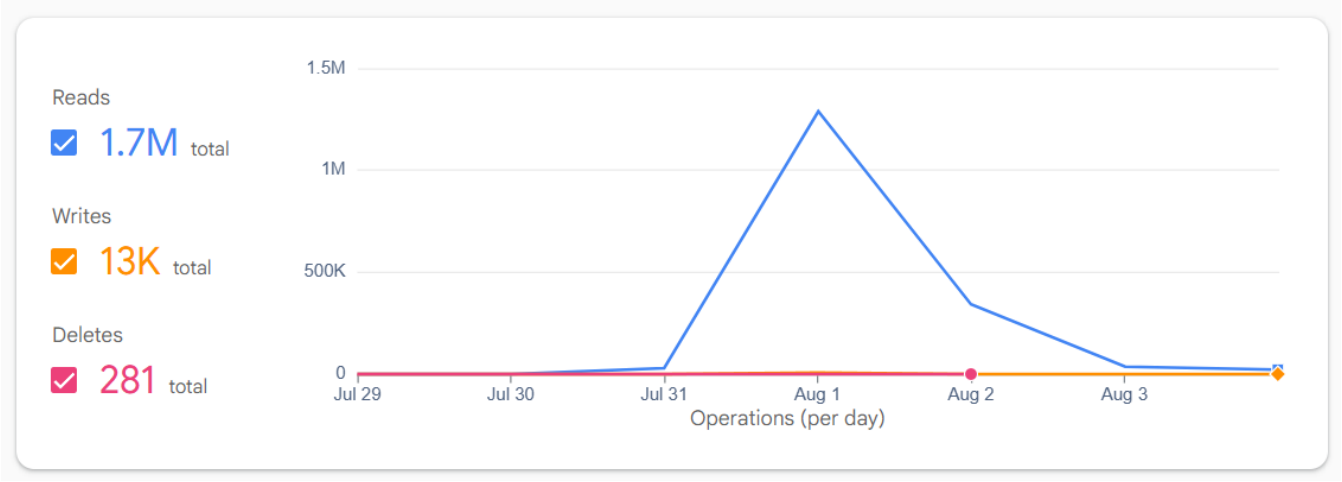

7,000+	3,15,000+	810	24
Unique Visitors	Page Reads in 2 Days	Peak Live Viewers	Events Covered

In just two days, nearly 7,000 people from the Sunbeam Group opened Sunfest.live to follow the action — and together they visited its pages over 3 lakh times. At its busiest moment, more than 800 people were watching live scores update on their screens at the very same second.

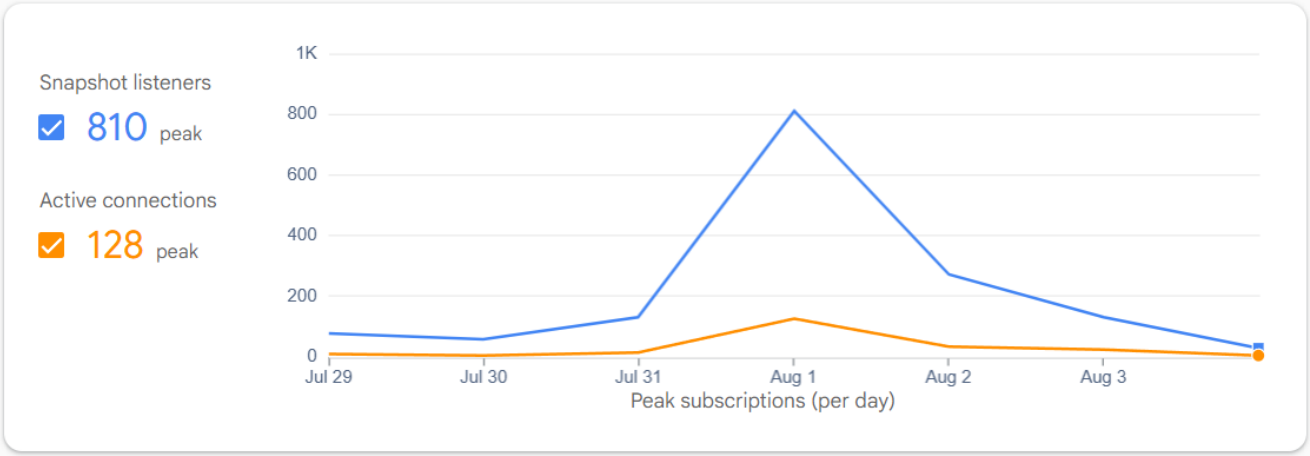

How Engagement Moved Through the Day

Activity followed the rhythm of the festival itself — quiet in the early morning, building steadily as events kicked off, peaking around midday when the most-awaited competitions were live, and picking up again in the evening for the finals and closing events.

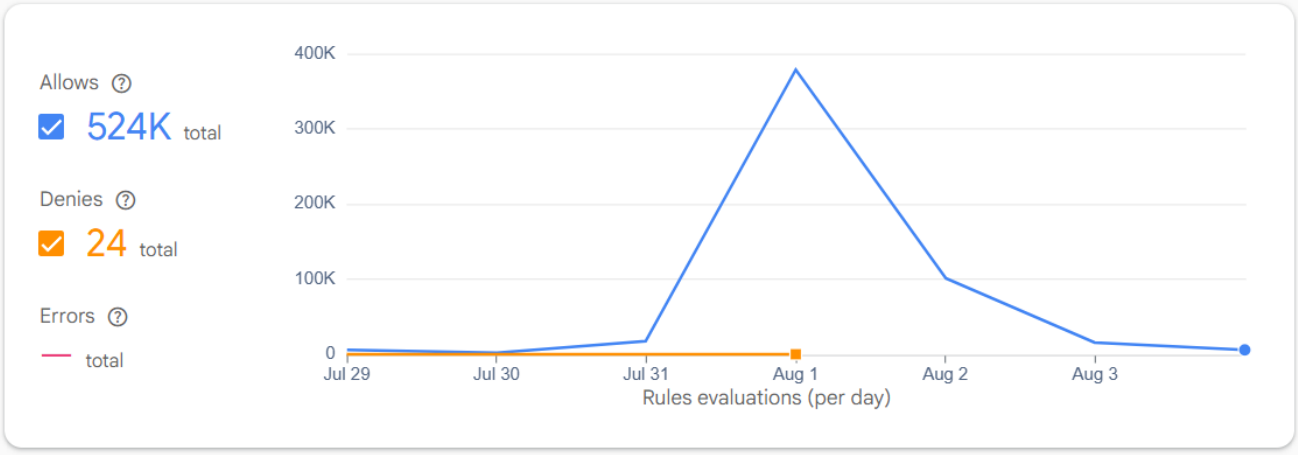

Subscription Metrics

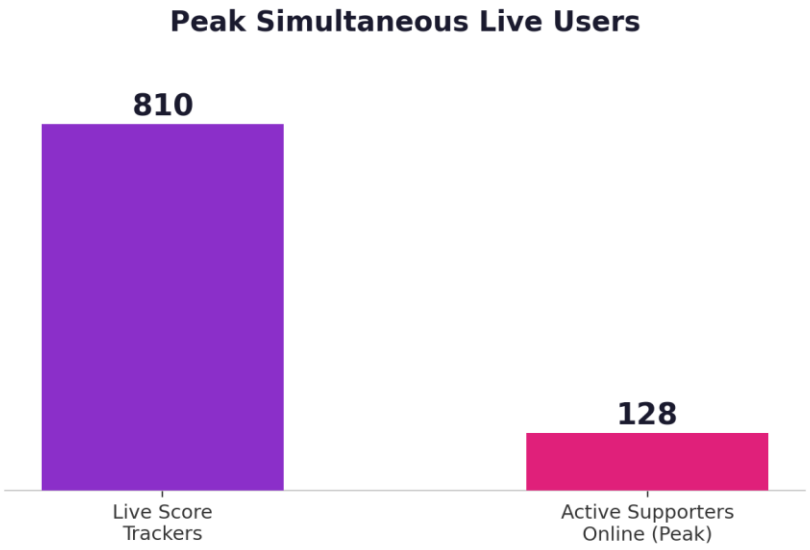

Rules metrics

A Crowd That Stayed Engaged

It wasn't just visits — people stayed. At peak, over 800 users were tracking live scoreboards continuously, while more than 125 were actively cheering and supporting their teams through the voting feature at the very same time.

What Made Sunfest.live a Hit

- **Live Scoreboard —** Real-time points and rankings for every event, updated the instant a result came in.
- **Real-Time Updates —** Live status for every event — Live, Upcoming or Completed — so nobody missed a moment.
- **Event Editorials —** Behind-the-scenes stories, highlights and news that brought the festival to life online.
- **Support Your Team —** A simple cheer-and-vote feature that let students and parents actively back their favourite teams.
- **Built for Everyone —** A clean, mobile-friendly design that worked effortlessly for students, teachers, parents and supporters alike.

Closing Note

The real success of Sunfest.live was not the technology behind it, but how naturally the entire school community adopted it — students checking scores between events, parents following along from home, and coordinators relying on it to keep everyone informed. It became, in every sense, the heartbeat of Sunfest 2026.

Grateful to the Sunbeam family for the trust placed in this initiative, and looking forward to making Sunfest.live even bigger and better for the years ahead.
